

## **Families & Caseworkers: *Your Input Will Help!***

The move from a foster home to an adoptive home is a crucial event in the lives of children in the child welfare system. Yet there is no published data on what is current casework practice! The intent of this study, conducted by popular local Oregon psychologist Dr. Redmond Reams, is to gather information on what actually happens during these transitions to guide caseworkers and caregivers, inform policymakers, and open discussions about what is best practice for children & families.
